

SAMEDAYTUNING.COM | Diesel & Gas Tuning

The Ford Powerstroke 6.4L engine comes with 2 different main operating systems for automatic transmissions. **(E or F transmission strategy)** This tuner comes equipped with preloaded custom tunes for both **E and F automatic transmission strategies**. If your truck is equipped with an automatic transmission proceed to the steps below.

If your truck is a manual / standard transmission truck, please email tuning@samedaytuning.com for the appropriate tunes

- 1) Connect supplied device (x4 or livewire) to vehicles OBDII port and turn the ignition to ON (do not start the vehicle).
- 2) Scroll down to vehicle info and locate the TCM Strategy.
 - a. Note whether the TCM strategy has an F or E anywhere in the strategy
 - b. Exit this screen
- 3) Click Program Vehicle, continue through prompts until you get to the tune screen
- 4) Find the tune that corresponds to strategy you noted above (E or F), and load that tune.
 - a. EX: Tune will be listed as "80HP F STRAT W TCM V1.1"

If wrong tune strategy was selected, it is not the end of the world and the truck will be fine. Symptoms will be the truck will go into reverse but not drive. If this is the case, just load the other strategy tune into the truck.
